Experience

Advize Technology Private Limited

AI/ML Intern

March 2026 – May 2026

Remote

- Engineered **RAG pipelines** with **context-aware retrieval** and chunking to optimize retrieval accuracy
- Integrated **OpenAI TTS** and **Whisper STT** via OpenAI to enable **real-time voice-based** content generation
- Built **chatbots** that crawled and assessed entire client websites for **context-aware Q&A**
- Optimized **token usage** across LLM calls, reducing overall API consumption and costs by **35%**

Lakshmi Information Technology Private Limited

Full Stack Developer Intern

October 2025 – January 2026

Remote

- Built full-stack **React Native** features, optimizing backend **REST API** payloads to **reduce server latency by 30%**
- Implemented UI components across **React web** and **React Native** mobile apps using shared style systems
- Debugged runtime **memory leaks** and rendering bottlenecks, **reducing production Android app crash rates by 15%**
- Configured automated **Google Play Store** deployment pipelines and optimized release **app bundle generation**

Projects

DevOps Agent – Autonomous Incident Remediation

LangGraph, FastMCP (Model Context Protocol), Docker, GPT-OSS, Pydantic Logfire, Chaos Engineering

- Built a **self-healing DevOps agent** using **LangGraph** and **FastMCP** for autonomous dockerized service remediation
- Designed a **multi-stage LangGraph pipeline** with **GPT-OSS** for automated root-cause analysis and planning
- Implemented **Human-in-Loop risk governance** gating critical **Docker** operations behind terminal-based approvals
- Built a **chaos engineering test suite** and **Pydantic Logfire** distributed tracing for end-to-end agent observability

Quant Agent – AI-Powered Equity Research Agent | Live Demo

LangGraph, Groq (OpenAI GPT OSS), Qdrant, Gemini, RAG, FastAPI

- Architected an **enterprise-grade financial RAG system** using **LangGraph** agentic AI workflows and routing
- Integrated **reranking models** and **Qdrant** vector semantic search across dense 10-K filings
- Mitigated LLM **hallucinations** in financial 10-K analysis via **reflection loops** and self-evaluating workflows
- Deployed a real-time conversational **chatbot with guardrails** to stream secure financial insights
- Implemented comprehensive system **observability** to monitor pipeline latency, retrieval accuracy, and token usage

Technical Skills

Languages: Python, SQL, JavaScript, C/C++

AI & GenAI: LLMs, GPT-OSS, Gemini, OpenAI (Whisper, TTS), RAG, Multi-Agent Systems, Prompt Engineering, NLP

AI Frameworks: LangGraph, LangChain, FastMCP, Agno, Qdrant, Sentence-Transformers, Reflection Loops, Guardrails

Backend: FastAPI, Node.js, REST APIs, WebSockets, Redis, Supabase, Firebase

DevOps & Observability: Docker, Kubernetes, Git, GitHub, Google Cloud Platform, Pydantic Logfire, Chaos Engineering

Areas of Interest: Agentic AI, LLM Engineering, Voice AI, AI Infrastructure, Applied GenAI

Education

Guru Gobind Singh Indraprastha University

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.64/10

New Delhi, India

Achievements & Leadership

Geek Room ADGIPS: Lead, Emerging Tech Department; organized AI workshops and hackathons 2025–2026

Social Summer of Code Season 5: Mentor, guided open-source contributors and reviewed pull requests 2026

Code Veda 2025 (Microsoft): Certificate of Appreciation for organizing the national event [[Certificate](#)] 2025

8X National Level Hackathon Finalist: Selected 8 times in nationwide hackathons as finalist 2025–2026
